Section 149 of the Welfare Reform Act of 1997 (Part B of Chapter 436 of the Laws of 1997)		

2002 Statistical Report On the Operations of New York State Temporary Assistance Programs

Introduction and Summary

This report was prepared in fulfillment of the reporting requirements contained in the Welfare Reform Act of 1997¹, and was compiled by the Office of Temporary and Disability Assistance (OTDA) with data developed by OTDA, the Department of Labor (DOL) and the Department of Health (DOH). Although the law only requires that collection of the required data “shall begin as soon as practicable, but in no case later than the completion of the redesign of the Welfare Management System and the completion of the Welfare-to-Work Caseload Management System,” this report, in the absence of the availability of these new systems, contains a large proportion of the required data by using currently available sources. As our data structure continues to improve, most notably through the continued development of the Welfare Reporting and Tracking System, we hope to increase both the quality and quantity of our reporting.

In order to allow time for the development of the data sources for this report, the time period covered in most of this report’s sections cover the period of July 2001 through June 2002 (referred to as the report year). Due to the fact that data on work activities is derived from data samples produced for federal reporting, these data cover the last available federal fiscal year.

What follows is a brief summary of current trends in the Temporary Assistance caseload for the July 2001 to June 2002 time period, and a high level summary of the data supplied in the main body of the report.

Recent Caseload Trends

Figure 1 illustrates the trend in total Temporary Assistance (TA) recipients for the July 2001 to June 2002 period. During this time, the total recipient count declined from 675,982 to 615,358, or by 60,624 recipients (9%). This decline was fairly steady throughout the period, except for an interruption in the October to January period.

¹ The reporting provisions are codified in §149, Part B of Chapter 436 of the laws of 1997. The full text of §149 is reproduced at the end of the report.

**Figure 1: New York State Temporary Assistance Recipients
July 2001 to June 2002**

Figure 2 shows the recipient count change for the same period for “family” cases, which consist of two components: 1) recipients in the Temporary Assistance to Needy Families (TANF) program (which in turn consists of Family Assistance (FA) and a small number of federally funded Safety Net Assistance (SNA) families where an adult in the case is mandated to drug treatment), and 2) former TANF cases in the SNA program by virtue of exceeding the TANF 60 month time limit.² Figure 2 also illustrates the change in the number of recipients in each of these component categories.

As with total recipients, recipients in family cases showed a substantial decline for the report period of 70,598, or 12%. In December 2001, the first month where cases could exceed the time limit and move to SNA, one can observe the substantial drop in TANF recipients and the appearance of the SNA time limit caseload. What is most important to note about the illustrated trends is that the drop in the TANF caseload and the appreciable leveling off of the SNA time limit cases nets to a decline in the total recipient count in family cases. Analysis of the time limited group shows that such cases continued to close in numbers nearly equal to the number of TANF cases exceeding the time limit and entering SNA. Also, for the report period the number of TANF recipients

² For various programmatic reasons, there are also a small number of cases with children in the portion of the SNA caseload that has not timed out from TANF. These cases are part of the analysis of the “singles” caseload to follow, but are a negligible portion of that caseload.

decreased at a rate in excess of the number of recipients moving into the SNA time limit category.

Figure 2: Recipients in Family (TANF and SNA Time Limit) Cases July 2001 to June 2002

Figure 3 shows the recipient count for “traditional” SNA cases, usually referred to as “singles” cases since they consist primarily of one-person adult cases. Here, we see a trend somewhat different than for that in the family cases. During the report year, the number of recipients in these cases increased by 9,974 (9%), from 108,122 to 118,096. This increase is the result of a steady rise from September through March. After March this caseload resumed the downward trend that pertained before September.

Figure 3: Recipients in Singles (SNA Non Time Limit) Cases July 2001 to June 2002

Report Summary

This summary, and the report as a whole, is organized by section headings which refer directly by letter to the subsections of the reporting requirements in statute. In some cases, reporting requirements for a particular section overlap with those in other sections. In these cases, appropriate cross-references will be provided in the body of the report.

Section a: Applications

Section a provides district level and statewide information on the number of total TA, FA and SNA applications approved, withdrawn and denied, and the reasons for denials. These numbers are summarized in Table 1.

Table 1: Applications Approved, Withdrawn and Denied

	Applications Approved	Applications Withdrawn	Applications Denied
Total Temporary Assistance	347,564	38,155	106,091
Family Assistance	126,916	21,164	39,540
Safety Net Assistance	220,648	16,991	66,551

The main reasons for application denials were failure to comply with application requirements, either employment-related (11,883 or 11%) or other requirements (48,889 or 46%). Financial denials totaled 12,492 or 12% of denials. A large number of denials (32,346 or 30%) fell into a miscellaneous “other” category. Most of the denial codes in this category fail to identify a clear reason for the denial, since the code used requires the caseworker to manually generate a close reason. Other denials in this category include failure to locate the recipient and cases where TA is denied but emergency assistance is provided.

Section b: Case Closings and Transfers

Section b provides district level and statewide information on the number of total TA, FA and SNA case closings, and closing counts by reason for closing. It also provides district level and statewide information on transfers between the FA and SNA case categories that occurred during the year.

Case closings totaled 341,170 for TA, 149,620 for FA and 191,550 for SNA. Overall, the most common reasons for case closings were failure to comply with program requirements not related to employment (131,287 or 38%), financial issues (77,451 or 23%) and failure to comply with employment requirements (49,719 or 15%).

Transfers from SNA to FA totaled 4,915 for the report year. Transfers from FA to SNA totaled 58,866. This FA to SNA number is very high by historical standards because this is the first year such transfers could occur as a result of FA cases exceeding their TANF time limit.

Sections c, d and e: Subsidized Work Activities, Unsubsidized Work Activities and Training and Educational Activities

These work activities sections are provided by the Department of Labor, and, with the exception of data on expenditures, are based on Federal Fiscal Year (FFY) 2001 TANF quarterly disaggregated data reports. These reports contain detailed data on monthly samples of TANF cases, and are submitted by New York State to the US Department of Health and Human Services. Section c provides statewide TANF data on the average monthly number of recipients participating in work activities, the number of recipients receiving an exemption from participating in work activities or disregarded in the calculation of the federal work participation rate, the type of work activities engaged in and the hours of work engaged in per week. Section c also contains data on expenditures in support of work activities for the same FFY. Section d contains sample-derived data on the number of TANF recipients in unsubsidized employment, and Section e contains similar data on the number of recipients in various education and training activities, and hours per week in such activities.

The sample data show an estimated monthly average of 49,300 active TANF recipients with budgeted earned income, 21,800 recipients participating in work activities (including subsidized public and private sector employment, work experience, on the job training, job search/job readiness training and community service activities) and 4,200 in education and training activities (including vocational education, job skills training, employment related education and school attendance). Details regarding the calculation and interpretation of the sample-derived figures are contained in the body of the report, so readers are referred there for a full explanation of the reported figures, including confidence intervals around the reported estimates.

Section f: Sanctions

Section f provides statewide, New York City and rest of state (non-New York City) data on the number and type of sanctions in TA, FA and SNA cases. These data are provided for two representative months in the year, December 2001 and June 2002, and indicate that around 22,000 individuals are in sanction status in a given month. Using the most recent (June 2002) data, we see that there were 22,457 persons in sanction status, which represents 9% of the approximately 250,000 adults on assistance at the time. Most (20,503 or 91%) of these sanctioned persons have an employment-related sanction. In New York City, virtually all sanctions are employment related.

Section f also provides district level and statewide data on the number of sanction-related fair hearings requested, the number of hearings held, and the outcomes of these hearings, for the full report year.³ These data are reported separately for total TA, FA and SNA cases. Readers of this section should note that the numbers reported are based on issues addressed, not hearings per se: more than one issue can be addressed at a hearing, and separate issues addressed at the same hearing can have different outcomes.

For the purposes of economy of presentation, Section f also contains fair hearings data on work related issues, since these overlap with sanction-related hearings and follow a similar format. Also included in this section are data on the number and outcomes of administrative disqualification hearings, i.e., hearings initiated by districts.

Due to the large number of issues addressed in the fair hearings section, they will not be summarized here. Readers should note, however, that outcome numbers will not sum exactly to hearing numbers since some issues initiated during the report year may still have been pending at the end of the report year.

Section g: Closings

All data available to meet the requirements of this section were presented in Section a.

Section h: Substance Abuse Treatment Programs

The Department of Health reports that 23,677 persons received substance abuse treatment services where those services were paid for by social services districts using public assistance money. Because data was not provided for the current report year, these data are for the July 2000 to June 2001 period.

Section i: Pregnancy Prevention Programs

In Section i, the Department of Health reports on participants in TANF funded family planning programs, the Comprehensive Family Planning and Reproductive Health Program and the Community Based Adolescent Pregnancy Prevention Program (CBAPP). The outreach and education portions of these programs served 110,284 participants, and 143,095 participants received at least one of the services provided under these programs. A detailed description of

³ Fair hearings outcomes described in the report are issues affirmed (i.e., the agency's determination is deemed correct), issues reversed (i.e., where the agency's determination is incorrect), issues withdrawn, issues correct when made (i.e., where the agency was correct at the time the decision was made, but changes in circumstances require agency action in favor of the client) and a catch-all "other" category.

these programs is included in the body of the report, along with district level data on the number of clients receiving any service provided by the programs.

Section j: Disabled and Work-Limited Recipients

Using data from the TANF disaggregated sample, the Department of Labor estimates that a monthly average of 26,000 recipients are exempt from participating in work activities.

Section k: Food Assistance Program

Section k provides district level and statewide data on the number of households and persons served in the Food Assistance Program (FAP), and the value of benefits provided by the program. It also reports data on fair hearings related to FAP and the related outcomes. Although this section of the statute contains extensive reporting requirements, most of them became inappropriate when eligibility for standard Food Stamps was restored to most participants in the original FAP program. Now, the program is limited to non-citizens who are 60 years of age or older, were not disabled and not 65 or older on August 22, 1996, and were residing in the FAP district of application on that date. FAP has also been expanded to non-citizen victims of domestic violence.

For the reporting year, there were only 512 households and 556 persons in the program, receiving benefits totaling \$67,268. Only 10 local districts had an active FAP program in the report year.

Section I: Domestic Violence

Section I reports district level and statewide data for the report year on the number of persons indicating a current danger on their screening form, the number of persons whose domestic violence assessments showed a credible threat, the number of waivers from TA program requirements granted to domestic violence victims and the average duration in months of active waivers. For the reporting period, 8,598 persons checked that there was a current domestic violence danger to them on the screening form. During the same period, 4,824 persons continued to a full domestic violence assessment where a credible threat was confirmed,⁴ and 3,998 waivers were granted. All waivers active during the period averaged 4 months in duration.

For the report period, 5,233 persons had domestic violence waivers, including persons whose waivers were granted previous to the report year. Note

⁴ Note that the difference between the number of persons indicating a threat and the number completing an interview where a credible threat is found cannot be interpreted that interviews result in the determination of a credible threat less than half the time. Most of the difference between these two numbers is due to the client not proceeding to the interview stage.

that here, as with the fair hearings data, it is not necessarily the same persons in each of the reported categories. For example, some persons may have been interviewed previous to the report year, but had their waiver granted during the year.

Section I also reports the number of active domestic violence waivers in each program requirement exemption category, along with the average duration in each category, for the State, New York City and the remainder of the state. Most waivers were granted for exemptions from employment requirements (4,144) and requirements to cooperate in the establishment of child support (4,127). Note here that waivers are specific to the requirements for which the waiver is granted. That is, a single domestic violence victim can have more than one waiver, say for instance if the person is exempted from both child support and work requirements. Thus, the number of waivers exceeds the number of persons with waivers. It is also possible that someone found to be a domestic violence victim will choose not to accept a waiver.

On the Job Training	0	*	*	*
Job Search/Job Readiness Training	1,900	± 400	1,100	2,700
Community Service Program	9,200	± 900	7,400	11,000
Child Care Provider	0	*	*	*
6. Hours of Work per Week \7	27.5	± 0.4	26.7	28.3
* Due to the small sample size, the standard error and confidence limits were not computed.				

General Comments:

The figures presented on these tables are based on Federal Fiscal Year 2001 data from the TANF quarterly reports submitted by New York State. Participation rates, characteristics and financial circumstances from these submittals have been released by the U.S. Department of Health and Human Services/Administration for Children and Families (HHS/ACF).

The data published in this report reflect all individuals engaged in work activities, regardless of the number of hours in these activities, rather than cases meeting the more restrictive participation criteria, as published by the HHS/ACF. Sample results for each month were inflated to reflect the universe of TANF cases as reported in Section 3 of the TANF quarterly report. For the count of each individual activity/transaction/characteristic appearing in this report, we followed the Federal methodology that averages monthly data to obtain fiscal year figures.

See Footnotes

2002 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

NEW YORK STATE DEPARTMENT OF LABOR

Data Related to Work Activities Subsidized or Otherwise Sponsored

Footnotes:

- \1 Average monthly number of TANF participants in subsidized work activities (subsidized private and public employment, and on-the-job training), work experience, job search/job readiness training, community service program, or providing child care services to an individual who is participating in a community service program. Recipients may be participating in more than one work activity. Subsidized work activities are not the only activities that count toward federal participation rate requirements. Additional activities can be found in Sections 149.2.d and 149.2.e.
- \2 Average monthly number of disabled individuals who are exempt from participating in work activities. Under Section 332-b of the Social Services Law, disabled individuals who are determined to be unable to engage in work activities are exempt in New York from participating in work activities. Despite this exemption, the TANF family is included in the calculation of the participation rate.
- \3 Average monthly number of individuals exempt from participating in work activities for other reasons. These data reflect recipients who are exempt from participating in work activities due to age, caring for a disabled family member in the home, being a victim of domestic violence, and VESID involvement. Despite this exemption, the TANF family is included in the calculation of the participation rate.
- \4 Average number of one-parent cases that have a child less than 1 year old who are disregarded from the participation rate calculation. Single custodial parents, or caretakers with a child under 12 months of age, who have not been required to participate are disregarded from the rate. The TANF family is thus excluded from the calculation of the participation rate. This disregard is limited to 12 months total during the 60 months lifetime limit.
- \5 Average monthly number of sanctioned individuals who are disregarded from the participation rate calculation. These data reflect recipients that are required to participate, but have been sanctioned for not participating. The cases in which these individuals are included are disregarded from the participation rate calculation as a result of being sanctioned during the reporting month, unless the case meets the required participation rate hours. These cases may be excluded from the calculation of the participation rate for up to 3 months during each federal fiscal year.
- \6 Average monthly number of TANF participants in subsidized/sponsored work activities by activity.
- \7 Average number of hours of participation per week per TANF participant in subsidized/sponsored work activities.

*** Note: The standard error, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)**

For example, the annual average of the number of recipients of public assistance found to be exempt due to a disability is 26,000 with an approximate standard error of 1,400. The approximate lower confidence limit is $26,000 - (2)(1,400) = 23,200$, and the corresponding upper confidence limit is $26,000 + (2)(1,400) = 28,800$. While it is not likely that the true population value is exactly 26,000 (the value based on the sample), we are 95% confident that the true population value is between 23,200 and 28,800.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to the total population of the TANF cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

2002 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

NEW YORK STATE DEPARTMENT OF LABOR

C. Expenditures in Support of Work Activities

	Work Activities October 2000 through September 2001			
	<u>FEDERAL</u>	<u>STATE</u>	<u>LOCAL</u>	<u>TOTAL</u>
Family Assistance (TANF - 265 Fund)	220,166,228	38,813,437	32,368,778	291,348,443
Safety Net	0	9,420,264	6,858,000	16,278,264
FSET (Food Stamp - 261 Fund)	35,521,458	8,683,880	19,451,892	63,657,230
Welfare to Work Block Grant	<u>42,101,669</u>	<u>12,344,776</u>	<u>10,916,230</u>	<u>65,362,675</u>
TOTAL	297,789,355	69,262,357	69,594,900	436,646,612

All of the activities supported by the expenditures shown in the chart above are designed to emphasize work and work preparation activities including basic education and post-secondary education.

The above expenditures cannot be distributed by county as several of the welfare employment programs are administered by providers who serve a multi-county geographic area.

2002 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

NEW YORK STATE DEPARTMENT OF LABOR

	Annual Averages (10/00 - 9/01)	Approximate Standard Error	Approximate 95% Confidence Limits	
			Lower	Upper
D. Data related to Unsubsidized Work Activities				
1. No. of Recipients Hired <u>\8</u>	49,300	± 1,700	45,900	52,700

(Also see **General Comments** in the work activities table Section 149.2.c.)

\8 Average monthly number of TANF participants in unsubsidized employment. These data reflect active recipients with budgeted earned income. Unsubsidized employment is not the only activity that counts toward federal participation rate requirements. Additional activities can be found in Sections 149.2.c and 149.2.e.

*** Note:** The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of recipients of public assistance found to be exempt due to a disability is 26,000 with an approximate standard error of 1,400. The approximate lower confidence limit is $26,000 - (2)(1,400) = 23,200$, and the corresponding upper confidence limit is $26,000 + (2)(1,400) = 28,800$. While it is not likely that the true population value is exactly 26,000 (the value based on the sample), we are 95% confident that the true population value is between 23,200 and 28,800.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to the total population of TANF cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

E. Data related to Recipient Training and Education Activities				
1. No. of Recipients in Training or Educational Activities by Type of Activity <u>\9</u>	4,200	± 600	3,000	5,400
Vocational Education	3,500	± 600	2,300	4,700
Job Skills Training	500	± 200	100	900
Education Employment Related	0	*	*	*
School Attendance	200	*	*	*
3. Length of and Duration of Training or Educational Activities				
Hours per Week <u>\10</u>	30.3	± 0.5	29.3	31.3

(Also see **General Comments** in the work activities table Section 149.2.c.)

\9 Average monthly number of TANF participants in education and training activities - total and by activity (vocational education, job skills training directly related to employment, education directly related to employment for individuals with no high school diploma or certificate of high school equivalency, or satisfactory school attendance for individuals with no high school diploma or certificate of high school equivalency). Training and educational activities are not the only activities that count toward federal participation rate requirements. Additional activities can be found in Sections 149.2.c and 149.2.d.

\10 Average number of hours of participation per week per TANF participant in education and training activities.

* **Note:** The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of recipients of public assistance found to be exempt due to a disability is 26,000 with an approximate standard error of 1,400. The approximate lower confidence limit is $26,000 - (2)(1,400) = 23,200$, and the corresponding upper confidence limit is $26,000 + (2)(1,400) = 28,800$. While it is not likely that the true population value is exactly 26,000 (the value based on the sample), we are 95% confident that the true population value is between 23,200 and 28,800.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to the total population of TANF cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

E. Expenditures in Support of Training and Education Activities

All of the activities and associated expenditures for the welfare employment programs are designed to emphasize work and work preparation activities including basic education and post-secondary education. As such, please refer to Section 149.2.c "Expenditures in Support of Work Activities" for further information.

NEW YORK STATE DEPARTMENT OF HEALTH

H. Data related to substance abuse treatment programs

For the reporting year July 2000 to June 2001, the New York State Department of Health reported that 23,677 persons received substance abuse treatment services where the services were paid for by social service districts using public assistance money.

2002 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

Accomplishments of Family Planning and CBAPP Programs funded by TANF Funds
for the period
July 2001 to June 2002

TANF funds have been utilized to significantly expand the Department of Health's Comprehensive Family Planning and Reproductive Health Program and the Community Based Adolescent Pregnancy Prevention Program (CBAPP). The Family Planning Program provides comprehensive family planning and reproductive health services including medical services, health education and outreach to low income, uninsured women. The Community Based Adolescent Pregnancy Prevention Program provides peer and parent education, youth development and outreach to high-risk adolescents.

Funding was provided to 59 family planning agencies that provide services in over 215 service sites. These providers expanded outreach and education activities in community settings, including schools, to educate children and adults regarding reproductive health and to provide programs to prevent adolescent pregnancy. TANF funding has provided an opportunity to focus the expansion of the program on state and federal priorities including:

Provision of community education, public information, and, counseling to prevent adolescent pregnancy and increase access to clinic services for teens who are already sexually active;

Increase outreach to women not likely to seek services, including traditionally under-served minorities and homeless and substance abusing women; and

Improved access in under-served areas to women and adolescents at risk for unintended pregnancy.

Health educators work in schools, in conjunction with community-based organizations, and other youth serving organizations to provide education on issues such as contraception, abstinence, HIV/AIDS and sexually transmitted diseases. They participate in health fairs, organize community youth forums and parent-teen retreats, and outreach to high-risk populations. Each family planning agency has at least one full-time health educator on staff. Many of the larger agencies employ several educators. These educators provided more than 8,000 education and training sessions for adolescents and adults, and reached an audience of 110,284 individuals in the past year.

Audience	Sessions	Participants	% of Total Sessions	% of Total Participants
Youth (1-12)	251	3,762	3%	3%
Teens	4,089	54,923	51%	50%
Parents/Adults	2,649	34,451	33%	31%
Professionals	685	11,304	9%	10%
Families	356	5,844	4%	5%
Total	8,030	110,284	100%	99%

Each year, providers expanded their programs and were able to expend all additional TANF funds. Concurrent with the availability of TANF funds, the Family Planning Program saw an 11% increase in total clients and a 12% increase in teen clients served. The income level of the vast majority of these clients would indicate that they are eligible for TANF, and the remainder are needy. The Department is projecting that more than 15,000 pregnancies and 9,000 births have been averted due to the increase in the number of clients accessing family planning services in 2001.

CBAPP programs work with peers, schools, parents, community health and human service organizations, local governments, businesses and the media to reduce adolescent pregnancy in targeted high-risk communities. Twenty-three CBAPP contractors provide services in over 50 high-risk areas in the state. Major program strategies include:

There are a number of family planning agencies that also receive CBAPP funding. As a result of the co-location of programs, CBAPP clients often benefit from family planning health education and medical services.

Providing community information and education to sensitize the public about the local need to address the prevention of unintended pregnancy among adolescents;

Promote abstinence and delay the onset of sexual activity among all adolescents;

Expand educational, recreational and vocational opportunities for teens to provide alternatives to sexual activity and develop skills that can lead to higher earning power and reduce the need for public assistance; and,

Provide access to comprehensive reproductive health care services to sexually active teens to prevent pregnancies, sexually transmitted diseases and HIV infection.

There are a number of family planning agencies that also receive CBAPP funding. As a result of the co-location of programs, CBAPP clients often benefit from family planning health education and medical services.

2002 STATISTICAL REPORT ON THE OPERATIONS OF NYS TEMPORARY ASSISTANCE PROGRAMS

NEW YORK STATE DEPARTMENT OF LABOR

	Annual Averages (10/00 - 9/01)	Approximate Standard Error	Approximate 95% Confidence Limits	
			Lower	Upper
J. Data related to disabled and work-limited recipients				
4. No. of current recipients of public assistance found to be disabled <u>\11</u>	26,000	± 1,400	23,200	28,800

(Also see **General Comments** in the work activities table Section 149.2.c.)

\11 Average monthly number of disabled individuals who are exempt from participating in work activities. Under Section 332-b of the Social Services Law disabled individuals who are determined to be unable to engage in work activities are exempt in New York from participating in work activities. Despite this exemption, the TANF family is included in the calculation of the participation rate.

*** Note:** The **standard error**, or standard deviation, of a sample estimate indicates how close the sample estimate comes to the corresponding unknown measurement for the entire population. The standard error of a sample estimate gives us the precision, that is, the range in which the true population value most likely falls. The true population value is expected to lie between these limits. The confidence levels give us the likelihood or probability that it will fall within that range, that is, the assurance that the true value would fall in this range. A 95% confidence level tells us that if we pick 100 similar samples from the population, the sample estimate would fall within approximately plus or minus 2 standard errors of the true value in 95 of those samples. (These are referred to as the upper and lower confidence limits.)

For example, the annual average of the number of recipients of public assistance found to be exempt due to a disability is 26,000 with an approximate standard error of 1,400. The approximate lower confidence limit is $26,000 - (2)(1,400) = 23,200$, and the corresponding upper confidence limit is $26,000 + (2)(1,400) = 28,800$. While it is not likely that the true population value is exactly 26,000 (the value based on the sample), we are 95% confident that the true population value is between 23,200 and 28,800.

The standard errors of the number of participants possessing a given characteristic, e.g. engaged in a certain type of work activity, were obtained by calculating the standard error of the proportion of those individuals in the sample. The proportions were then applied to total population of the TANF cases. Therefore, the result is a measure of the number of participants with a given characteristic in the entire population.

The results obtained were based on monthly stratified samples and the stratification process varied, thus the results are approximate. Stratification is a statistical process in which the total population is divided into mutually exclusive subpopulations, prior to sampling. This process was required by the federal government in order to better gauge the characteristics of the subpopulations.

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

S 149.

1. The department of social services or its successor agencies and the department of labor shall collect data related to the operation of public assistance programs including, but not limited to, information that must be submitted to the department of health and human services pursuant to the personal responsibility and work opportunities reconciliation act of 1996 (P.L. 104-193) and any other provision of federal or state law or regulations governing programs administered under title iv-a of the social security act or the social services law. Social services districts shall assist each agency in accumulating such data in accordance with instructions from the appropriate agency.
2. Each agency shall make reasonable efforts to collect and maintain the data required pursuant to this subdivision. Data collection shall begin as soon as practicable, but in no case later than upon the completion of the redesign of the welfare management system and the completion of welfare to work caseload management system. The responsible agency shall collect the data related to applicants and recipients of public assistance programs established pursuant to the personal responsibility and work opportunities reconciliation act of 1996 (P.L. 104-193) and the social services law including, but not limited to, the following:
 - a. Data related to applicants seeking public assistance including but not limited to:
 1. Number of applicants accepted to participate in each program;
 2. Number of applicants who are denied public assistance and the reason for denial;
 3. Number of applicants who were previous recipients of public assistance on or after December 2, 1997 including length of time previously on assistance; reason for initial termination; length of time between termination and reapplication; and reason for reapplication; and
 4. Number of applicants who have resided in the state for fewer than twelve months at the time of application.
 - b. Data related to recipients of public assistance including but not limited to:
 1. Number of terminated recipients of public assistance and reason for termination; and
 2. Number of recipients that move between public assistance programs.
 - c. Data related to work activities subsidized or otherwise sponsored by the department of social services, its successor agencies, the department of labor, or social services districts including but not limited to:
 1. Number of recipients participating in work activities;
 2. Number of recipients receiving an exemption from participating in work activities;
 3. The duration of and reasons for such exemptions;
 4. Number of participants receiving subsidized child care and the number of exemptions granted due to lack of available child care;
 5. The type of work activities;
 6. Hours of work per week per recipient;
 7. Duration of enrollment in such work activity;

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

8. Reason for termination from work activity;
9. Number of requests for administrative hearings related to work activity participation including the nature of such requests by general categories and the outcome of such hearings;
10. Number of participants receiving subsidized transportation services;
11. Participant retention in work activities by type of work activity;
12. Length of time before assignment to a work activity;
13. Number of recipients changing work activity assignments and reasons for such changes; and
14. Expenditures by social services districts in support of work activities.

d. Data related to unsubsidized work activities including but not limited to:

1. Number of recipients hired;
2. Initial rate of pay by either annual salary or wage basis;
3. Retention rates;
4. Means of obtaining unsubsidized employment including, but not limited to, referral by the social services district and direct contact with employer; and
5. Number of participants receiving subsidized child care and/or transportation services.

e. Data related to recipient training and education activities including but not limited to:

1. Number of recipients in training or educational activities by type of activity;
2. Number of recipients mandated to attend training or education activities that fulfill work participation requirements;
3. Length and duration of training or education activity including the number of hours per week and duration;
4. Number of recipients receiving subsidized child care and/or transportation services;
5. Number of recipients transferred to work activities;
6. To the extent available, the number of recipients who obtain work directly from training or education activities including starting salary and employee retention rates; and
7. Expenditures by social services districts in support of training and education activities.

f. Data related to recipient sanctions including but not limited to:

1. Number of sanctions, by type of sanction;
2. Number of sanctions with defined minimum period, by type of sanction;
3. Average length of sanction until recipient compliance, by type of sanction;
4. Amount of sanction, by type of sanction;
5. Period of time starting on or after December 2, 1996 that the participant was in the program prior to the sanction;
6. Number and outcome of administrative hearings related to sanctions, by type of sanction; and
7. Number of sanctions against entire assistance unit.

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

- g. Data related to case closings including but not limited to:
1. Number of case closings;
 2. Reason for case closing including, but not limited to, self-termination without reason;
 3. Length of time receiving assistance on or after December 2, 1996 before case closing;
 4. On an aggregate basis, the length of time recipients do not receive public assistance in New York state following case closing occurring on or after December 2, 1996; and
 5. Number of former public assistance recipients receiving subsidized child care and/or transitional medical assistance.
- h. Data related to substance abuse treatment programs including but not limited to:
1. Number of recipients receiving substance abuse treatment services for which the cost of such services is paid for by the social services district using public assistance monies;
 2. Length of reimbursed recipient participation in treatment program; and
 3. Types of substance abuse treatment programs receiving reimbursement from social services districts.
- i. Data related to pregnancy prevention programs funded through federal monies received by the state pursuant to title iv-a of the social security act including but not limited to:
1. Number of program participants;
 2. Duration of program participation; and
 3. Types of services provided.
- j. Data related to disabled and work limited recipients of public assistance pursuant to provisions of the welfare reform act of 1997 including, but not limited to:
1. Number of persons applying for public assistance that are screened;
 2. Number of current recipients of public assistance screened;
 3. Number of persons applying for public assistance that are found to be disabled;
 4. Number of current recipients of public assistance found to be disabled;
 5. Number of persons applying for public assistance found to be work limited;
 6. Number of current recipients of public assistance found to be work limited;
 7. Duration of finding by category;
 8. Number of changes in work activity exemption status;
 9. Number and outcome of administrative hearings related to the disability screening and the determination of work activity exemptions; and
 10. Data relating to work and training and education activities pursuant to subsections c, d and e of this section.
- h. Data related to the food assistance program including but not limited to:

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

1. Number of applicants under eighteen years of age by chronological age;
2. Number of applications denied by reason for denial;
3. Number of recipients under eighteen years of age by chronological age and the average amount of food assistance benefits per recipient issued by the social services district;
4. Number of recipients under eighteen years of age by case and by household and the average amount of food assistance benefits issued per case and per household by the social services district;
5. Number of recipients under eighteen years of age in a case and/or in a household where other individuals in the case and/or household are in receipt of federal food stamp benefits and the average amounts of federal and state food stamp benefits issued per case and/or per household by social services district;
6. Number of recipients under eighteen years of age in a case or household receiving other public assistance benefits and the average amounts of food assistance benefits issued per recipient and per public assistance case by the social services district;
7. Number of case closings for cases where the recipient is under eighteen years of age by reason for case closing including but not limited to case closing as a result of naturalization;
8. Number of applicants applying for food assistance benefits where the primary reason for potential eligibility is a disability as defined by provisions of this act establishing a food assistance program;
9. Number of applications denied by reason for denial;
10. Number of disabled recipients by chronological age and the average amount of food assistance benefits per recipient issued by the social services district;
10. Number of disabled recipients by case and by household and the average amount of food assistance benefits issued per case and per household by the social services district;
11. Number of disabled recipients in a case and/or in a household where other individuals in the case and/or household are in receipt of federal food stamp benefits and the average amounts of federal and state food stamp benefits issued per case and/or per household by social services district;
12. Number of disabled recipients in a case or household receiving other public assistance benefits and the average amount of food assistance benefits issued per recipient and per public assistance case by the social services district including, but not limited to, receipt of federal and/or state supplemental payment made pursuant to title xvi of the social security act;
13. Number of case closings for cases where the recipient is disabled by reason for termination including but not limited to case closing as a result of naturalization;
14. Number of applicants applying for food assistance benefits where the primary reason for potential eligibility is that the applicant is elderly as defined by provisions of this act establishing a food assistance program;
15. Number of applications denied by reason for denial;
16. Number of elderly recipients by chronological age and the amount of food assistance benefits per recipient issued by the social services district;
17. Number of elderly recipients by case and by household and the average amount of food assistance benefits issued per case and per household by the social services district;

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

18. number of elderly recipients in a case and/or in a household where other individuals in the case and/or household are in receipt of federal food stamp benefits and the average amount of federal and state food stamp benefits issued per case and/or per household by the social services district;
19. Number of elderly recipients in a case or household receiving other public assistance benefits and the average amount of food assistance benefits issued per recipient and per public assistance case by the social services district including, but not limited to, receipt of federal and/or state supplemental payment made pursuant to title xvi of the social security act; and
20. Number of case closings for cases where the recipient is elderly by reason for termination including but not limited to case closing as a result of naturalization; and
21. Number and outcome of administrative hearings related to the food assistance program by general category.

h. Data related to the domestic violence screening process including but not limited to:

1. Number of applicants and recipients screened;
2. Number of positive findings;
3. Number of waivers by category granted as a result of a positive finding; and
4. Duration of such waiver.

3. To the extent possible, the data collection activities required by this act shall be designed to collect data in the least expensive and least time consuming manner possible. Scientifically acceptable statistical sampling methods may be used to collect and maintain data on an aggregate basis when authorized by the department of health and human services or when the commissioner of social services or commissioners of its successor agencies determines that collection of such data by any other means is not practicable or would result in significant additional costs. To the extent that statistical sampling is used to collect and maintain data, and unless otherwise required by the department of health and human services, the sample size shall be no larger than the sample size required by the United States department of agriculture for food stamp quality control purposes pursuant to the food stamp act of 1977 and subsequent amendments.
4. The commissioner of social services or commissioners of its successor agencies, and the commissioner of labor shall provide reports summarizing data collected pursuant to this act to the temporary president of the senate, the chairperson of the senate finance committee, the speaker of the assembly, and the chairperson of the assembly ways and means committee. The first such report shall be provided to the temporary president of the senate, the chairperson of the senate finance committee, the speaker of the assembly, and the chairperson of the assembly ways and means committee no later than December 2, 1998 and annually thereafter. The commissioner of social services or the commissioners of its successor agencies, in conjunction with the commissioner of health and the commissioner of labor, shall provide the temporary president of the senate, the chairperson of the senate finance committee, the speaker of the assembly, and the chairperson of the assembly ways and means committee with an annual report summarizing data collected pursuant to this act.

Welfare Reform Act of 1997

(section 149 of Part B of Chapter 436 of the Laws of 1997)

5. Each agency shall provide the temporary president of the senate, the chairperson of the senate finance committee, the speaker of the assembly, and the chairperson of the assembly ways and means committee with all reports filed with the department of health and human services pursuant to the data collection and reporting requirements of the personal responsibility and work opportunities reconciliation act of 1996 (P.L. 104-193).

6. The commissioner of social services or the commissioners of its successor agencies, in conjunction with the commissioner of labor, and the commissioner of health shall develop a plan to provide the legislature with the ability to have online access to the welfare management system and the welfare to work caseload management system upon completion of the redesign of the welfare management system and implementation of the welfare to work caseload management system for purposes of obtaining aggregate program data. Such plan shall provide for security measures necessary to ensure the confidentiality of data residing on the welfare management system and the welfare to work caseload management system in conformance with all applicable federal and state laws and regulations. The plan shall be submitted to the temporary president of the senate and the speaker of the assembly no later than February 15, 1998.
